## Wheeler Threatens to Break With Democrats on War Issue

### Our Daily Bread

Sliced Thin by The Editor

ALEX. H. WASHBURN  
500th Anniversary of Printing

China, Europe, America — and Japan

This is the 500th anniversary year of the invention of printing with movable type — a quite humble invention by comparison with the intricate marvels of 20th Century mechanics, and yet, without printing there would have been no machine era at all. For it was printing that reduced men's ideas to paper, conveyed those ideas around the world, and created a pool of public information for all to use.

### Panzer Divisions Strongest Force in War to Date

Germany's Nearest  
Thing to "Irresistible Force"

### AVIATION SUPPORT

One Tank Makes Over  
Eighty Miles Per  
Hour

By PAUL L. REED  
Major, Coast Artillery Reserve, U. S.  
Army; NEA Special Correspondent

The new German offensive against France depends on the most powerful mechanized force in the history of warfare—the armored Panzer divisions (Panzerdivisionen) with a possible 12 to 1 superiority over the armored vehicle strength of the allies.

First tested in the Spanish Civil War, these divisions were proven in Poland and Flanders, and now seek to deliver the final smashing blow to France.

They include the largest tank organization ever formed, thousands of armored cars, motorized battalions. The light tanks travel 25 miles an hour and faster, and the armored cars and motorcycles exceed 50 miles. With this tremendous speed the Panzer divisions dash into the Blitzkrieg.

Attack, Bombardment Aviation. Support Divisions

The mass of tanks, formed in echelons, moves ahead at full speed, preceding the infantry. The first echelon smashes forward to the limit of its power or until resistance stops it. This unit has motorcycles whose job it is to capture anti-tank nests. The tanks smash at machine gun positions. Some tanks or armored cars tow bridges, smash at machine gun positions, under certain conditions the still mysterious amphibious tanks also are a part of the first echelon.

Next, the second echelon drives in, striking at the points of greatest resistance, making the forward movement of infantry, which advances in lightly-armored cross country trucks, accompanied by anti-tank guns. This second echelon then "fans out" to extend the forward salient and to resist counter attacks.

Last comes the third tank echelon, covering the mechanized artillery as it moves up into position. It has anti-tank units also.

Both attack and bombardment aviation in force support the Panzer attack, making it the nearest thing to an "irresistible force" ever seen on a battlefield.

One Tank Makes 85 Miles An Hour

The complete strength of a single Panzer division is somewhere between 450 and 500 tanks, so the estimated

### CRANIUM CRACKERS

Do You Know Your Bible? The following questions will test whether you know much about the Bible. The questions are not unusual and you should get all of them if you attend Sunday School regularly.

1. Nahum was (a) Hebrew prophet; (b) Tyrant of Nineveh; (c) Roman soldier.

2. Naboth owned (a) faithful slave; (b) herd of goats; (c) vineyard.

3. Naomi was Ruth's (a) daughter-in-law; (b) sister; (c) mother-in-law.

4. Ezekiel was (a) major prophet; (b) Tyrant of Nineveh; (c) of Syria.

5. Hezekiah was (a) king of Judah; (b) son of Abraham; (c) servant of Ahab.

Answers on Page Two

### Will Not Support It as 'War Party' Senator Declares

Holt, West Virginia,  
Flays Army, Navy  
Sales Abroad

### START NEW SHIPS

Two 45,000-Tonners,  
20 Other Warships,  
Are Begun

WASHINGTON — (AP) — Senator Wheeler (D-Mont.) declared in the senate Wednesday he would "break with the Democratic party" if it became a "war party", and added he would not support any presidential candidate "who is going to try to get us into this war."

He made this assertion after Senator Holt (D-W. Va.) asserted the sale of army and navy equipment to the Allies had been accomplished "under subterfuge and under hypocrisies."

Start New Battleships

WASHINGTON — (AP) — The navy announced Wednesday work was ordered started on two new 45,000-ton battleships and 20 other warships and auxiliaries Tuesday night within an hour after President Roosevelt had signed the navy's \$1,400,000,000 appropriation act.

Officials said the navy acted with a swiftness unmatched even in the World War.

### Bobo, Magician, Is Here on Thursday

Is Sponsored by the  
Hope Boys Band  
Auxiliary

Magic is said to be one of the oldest forms of entertainment, yet just how entertaining modern magic can be with an accompaniment of clever dialogue will be demonstrated by Bobo, master magician, who will appear here at 8 o'clock Thursday at the City Auditorium, under the auspices of the Hope Band Auxiliary.

Bobo has spent a number of years in the study of his profession and has done considerable research on the subject.

He points out that magic was spoken of in the Bible as an instrument used by the priest to gain and hold their followings. He says that magic is closely associated with superstition and was put to much evil use until the last two centuries, during which education has gradually pushed superstition from the lives of man and magic has become an entertainment diversion.

### Mexico of 1940 on Rough Economic Road With Failure of Rail and Oil Policies

### Government Takes Roads From Union; Hits Oil Workers

Communist Rail  
Venture Proved Total  
Failure

### UNDECIDED ON OIL

Government Demands  
Dismissal of 1,800  
Workers

This is the third of three articles  
analyzing Mexico's chances for re-  
volution.

By ROBERT P. DORMAN  
(Written for NEA Service)

EL PASO, Tex. — Mexico remains a country of vivid contrast. Its communities still range from squalid poverty-stricken villages to beautiful Mexico City with its many parks and attractive suburbs.

The worker of Mexico is disillusioned. Economic conditions have not improved as much as was expected, and while new roads have been built and a vast number of schools created in the past few years, the age-old economic pinch in the Republic still exists.

Operation of the railroads by the syndicates, the Mexican form of American labor unions, was a failure. The railroad lines were recently taken back by the government. Expropriation of the oil wells did not result in the golden return anticipated.

The real avenue of prosperity in Mexico is the great International Highway. The towns and cities along this road appear prosperous.

3000 Miles Through Mexico

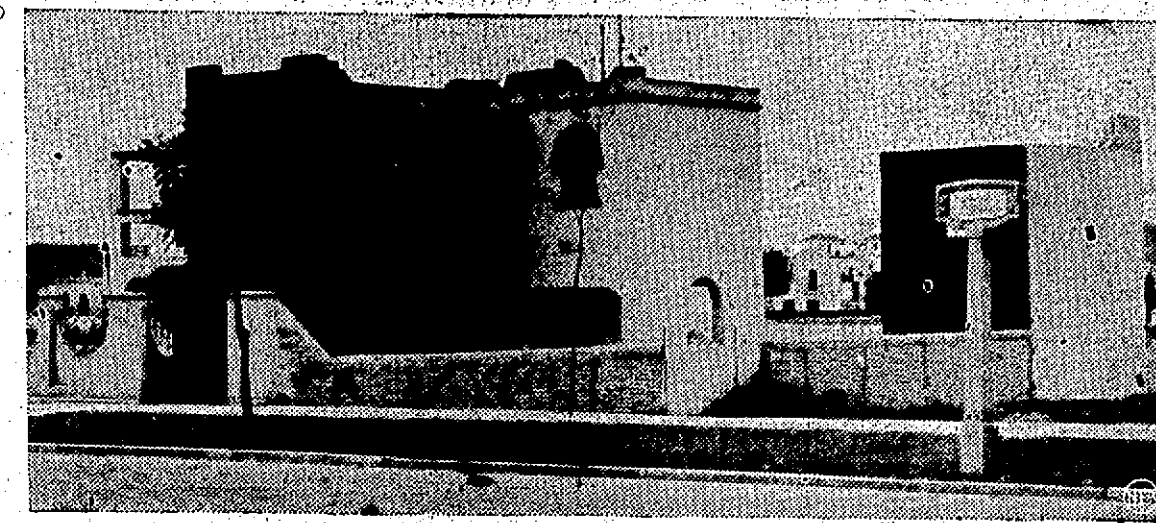

Following the itinerary of a recent 3000-mile trip through Mexico, here are thumbnail sketches covering my observations:

Matamoras. A squalid town opposite Brownsville, Texas, on the lower Rio Grande. Streets so bad Mexican authorities at the border will not permit tourists to carry cameras. Immediate activity, however, in the laying of sewers and paving of streets. Ample employment owing to improvements being carried out.

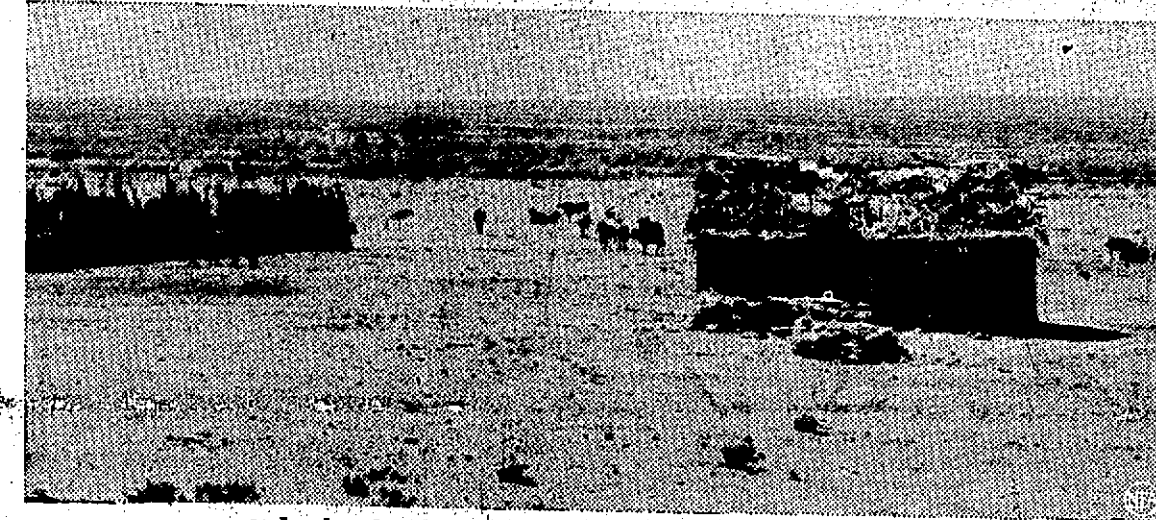

Railroad from Matamoras to Monterrey. Probably the worst railroad on one continent. Deprived of equipment and condemned repair while under worker administration. Wrecks, mostly minor, of almost daily occurrence. Government promising rehabilitation under government operation. Speed average under 25 miles an hour.

Monterrey. First large city on the

Mexican contrast . . . a two-tone ultra-modern home in suburban Mexico City . . .

. . . and a hovel and remnant of once vast cattle herds in Chihuahua.

### One British, Five French Generals Captured by Nazis

Surrounded at Chan-  
nel, They surrender,  
Nazis Say

### PARIS HOLDS OUT

Battle for French Cap-  
ital Still Is Rag-  
ing

BERLIN — (AP) — The German high command announced Wednesday night French troops "surrounded at St. Valery, on the English Channel, had capitulated, and that more than 20,000 prisoners had been taken."

The captives, it was claimed, included one French corps general, one British corps general and four French divisional generals, and the material taken thus far was described as "incalculable."

Turkey Marking Time

ANKARA — (AP) — The Turkish government decided to take no immediate action as the result of Italy's entry into the war but to concentrate on preparations for defense of her country, informed sources said Wednesday night.

Informants emphasized, however, that the Turkish government's attitude did not mean Turkey is retreating from her engagements with Britain and France but merely awaiting developments.

Egypt Cuts Off Italy

LONDON — (AP) — Egyptian Chamber of Deputies Wednesday approved a declaration by Prime Minister Pasha severing diplomatic relations with Italy, the Reuters news agency reported in a dispatch from Cairo.

By the Associated Press

Battle-stained French Polaris fought doggedly in a "last ditch" defense of Paris Wednesday—reportedly holding fast on the Old World war battlefields of Chateau Thierry and Meaux along the Marne—while the German high command said its armies had smashed within 12½ miles of the French capital on the northwest.

"Nowhere have the French defenses been pierced," said a Paris spokesman, who cited terrific German assaults all along the Western Front from the lower Seine to the Argonne forest.

Rome reported the first enemy assault on Italian soil since Mussolini declared war Monday—an unspecified attack on the Ligurian coast, where the great Italian shipping port of Genoa is situated.

Earlier, London reported a British bombing attack on northern Italy.

To the quickening beat of the war tempo, Italy was reported to have handed an ultimatum to Egypt.

Parris Hears Guns

The din of the enormous conflict could be heard in the streets of the French capital, and flashes of gunfire were plainly visible from the house-tops of once "Gay Paris."

R. A. Butler, British undersecretary for foreign affairs, announced Wednesday that Thailand (Siam) had signed separate non-aggression pacts with Britain, France and Japan.

It Was German Submarine

BERLIN — (AP) — It was a German submarine which stopped the United States liner Washington at dawn Tuesday on its refugee-carrying European voyage, authorized German sources disclosed Wednesday.

British Bombs in Switzerland

BERN — (AP) — The federal government of Switzerland announced officially Wednesday that an examination of the aerial bombs which killed four and wounded many others around

(Continued on Page Six)

### Ask Louisiana to Return Man Here

I. S. McKee Sought on  
Hope Forgery, Ut-  
tering Charges

LITTLE ROCK — (AP) — Governor Bailey in a requisition Wednesday asked for the extradition of I. S. McKee from Bossier Parish, La. to Hope on a charge of forgery and uttering. The warrant said a note given Archer motor company at Hope was in-  
volved.

### Columbus Board Elects Teachers

All Teachers Are Re-  
elected for 1940-41  
Term

At a recent board meeting the Columbus Board of Education reelected the following teachers for the 1940-41 school year:

Principal, Hugh Bristow, English; Forney Holt, math and science; Mrs. R. C. Reed, first and second grades; Mrs. Forney Holt, third and fourth grades; Miss Dorothy Stophs, fifth and sixth grades.

The social science teacher in the high school department has not been employed to date.

### M'Mahen Speaks at Kiwanis Meet

"Remember the Mid-  
dle Man" Is Fully  
Discussed

B. E. McMahon, administrative assistant to the agricultural adjustment administrator of Hempstead county, gave an interesting talk on "Remember the Middleman" at the noonday luncheon of Hope Kiwanis club Wednesday at Hotel Barlow.

Mr. McMahon discussed at length the value of the farmer's dollar and gave an interesting comparison on decline of the purchasing power of cotton 20 years ago and today.

Magnesite, a mineral which resembles white marble, is used as lining material in steel furnaces because it withstands a temperature as high as 5200 degrees Fahrenheit.

### Marriage Licenses

The following marriage licenses have been issued by County Clerk Frank Hill at the Hempstead County Courthouse.

White  
Andrew Long, 22, to Miss Eva Mae Walters, 18. Both of McCaskill.

Colored  
Arthur Nash, 53, to Laura McFadden, 34; both of Fulton.

Phillip Powers, 25, to Laura Bell Logan, 23; both of Hope.

Ewell Palmer, 23, to Bessie Lee Flannigan, 23; both of McNab.

Sam Nelson, 40, to Silvia Harris, 24; both of Hope.

### Swimming Classes Start on Monday

Jack Turner to Lecture  
and Supervise  
Courses

Jack Turner, former Hope high school football player and now coach at Dierks, Ark., announced Wednesday that he would conduct a swimming course at the Pines Pool here this summer.

The class, starting Monday June 17, will be divided into two classifications: beginners and advance students. Beginners will be taught how to swim, and correct swimming form. Advance students will be instructed in Red Cross lifesaving and arrangements have been made to give them the final test.

Classes are to be held on Monday, Tuesday, Thursday and Friday of each week and will last one hour a day for 12 days. Hours will be arranged to meet the convenience of students. Safety lectures on proper swimming, correct water to swim in and hazards of swimming will follow each lesson.

Anyone interested is asked to get in touch with Mr. Turner or leave the name at The Star office.

### Red Cross Total \$865 Wednesday

Donations Slow Down  
as Only \$5 Is Con-  
tributed

Only one name was reported Wednesday in Hempstead county's Red Cross drive for Europe's war victims.

The name of Miss Ruby McKee was omitted from Tuesday's list but her donation of \$1.00 was added to the list.

Donations follow:  
Previously reported \$860.11  
Miss Martha Cantley 5.00  
Total \$865.11

Liberia, with a population of 1,500,000, almost entirely African, has no railroads.

### A Thought

The centurion answered and said, Lord, I am not worthy that thou shouldst come under my roof: but speak the word only, and my servant shall be healed.—Matthew 8:8.

### Hugh D. Clark in Legislative Race

Seeks No. 1 Post, and  
Publishes Campaign  
Platform

Hugh D. Clark announced today in The Star's political announcement column his candidacy for the No. 1 legislative post in Hempstead county subject to the Democratic primary election August 13.

Mr. Clark's statement follows: "It is a pleasure to hand the press my announcement as a candidate for Representative of Hempstead county. I am seeking the No. 1 post that was held by Attorney John P. Veasy who defeated me two years ago by 82 votes."

"I am the only farmer in this contest and naturally I have the interest of the farmer at heart."

"My platform:

"1. To secure a large return to the small farmer and co-operate with the various agricultural agencies to better farm conditions.

"2. To seek the advice of taxpayers, parents, and teachers to maintain good schools.

"3. To pave High No. 29 from Howard county line to Louisiana line with state funds.

"4. To seek relief for property owners in Hope that are burdened by paying tax.

"5. To support a refunding bill to enable our state to maintain our road program.

"6. To practice rigid economy in our state government, as our taxes for national defense will be a heavy burden on our taxpayers.

"I am 40 years old, and I moved to Hope in 1919 after receiving my discharge from the World War. I have reared my family here.

"I believe that with trying times ahead our legislature should have a man with experience and sound judgment."

"I hope to see as many voters as possible before election. I want to thank my many friends for their interest and assure them my continued appreciation and friendship."

"Hugh D. Clark"

An inquest into a fire and explosion in London ended after seven months. The jury heard 1,674,000 words of evidence, and as a compensation for their work, were exempted from further duty for life.

COTTON

NEW YORK — (AP) — October cotton opened at 8.95 and closed at 9.08. Middling spot 10.58.

# Uncle Sam Gets the Big Money

Like Midas, the U. S. Is Wallowing in Gold

By CLAUDE A. JAGGER  
Associated Press Financial Editor

Uncle Sam, like Midas, finds himself wallowing in gold. Will he, like Midas, be flabbergasted when he finds he cannot eat gold?

This question has been propounded frequently of late, as the yellow metal has streamed from war-ridden Europe to America.

The United States treasury currently holds more than \$19,250,000,000 worth of it—some 70 per cent of the known monetary yellow metal stocks of the world.

In addition, the Federal Reserve Bank of New York has in its vaults huge stores of glittering bars for the account of European central banks. The total as of May 31 was \$1,270,000,000, and a good chunk has been added since, perhaps \$500,000,000.

Brought by Convoy? The money gold held by Uncle Sam (these figures do not include gold in rings and watch cases and otherwise employed in industry and the arts) has almost trebled since the value of the dollar was fixed at 1:35 of an ounce of the stuff by the Gold Exchange Act, Jan. 31, 1934.

The money metal, in the form of bars about the size of a small car of corn, worth \$12,000 each and nested, rolled in from overseas at the rate of about \$250,000,000 a month during the early months of the war, until May, when the total jumped to \$440,000,000. Early in June, between \$300,000,000 and \$600,000,000 arrived in New York from Canada in three days alone, supposedly brought across the Atlantic by convoy.

Most of the gold comes through the big banks in their international transactions. They immediately sell it to the treasury at \$35 an ounce. The Federal Reserve bank in payment, and the commercial banks receive deposit credits for them. They are required to keep a certain volume of reserves with the Reserve Banks, but they now have reserves of more than \$6,500,000,000 in excess of requirements, principally due to the gold influx.

Bankers Still Trust in It Nazis proclaim that they are fighting against, among other things, "the tyranny of gold." Soon after the Hitler government came into power in 1933, it shipped out all but a few million dollars worth of its money metal, in payment of debts, and proceeded thereafter on a barter basis.

It has not hesitated to use gold to make foreign payments, however, when it could get it. Holland and Belgium are believed to have shipped out most of their gold before they were invaded, and other countries threatened with invasion have rushed much of their yellow metal treasure to this continent.

A part of the Nazi philosophy as

"Dr. Kildare's Strange Case"

# HARRISON IN HOLLYWOOD

By PAUL HARRISON, NEA Service Correspondent

# Douglas Fairbanks, Jr., Determined to Produce Movies With Himself as Male Star, Like Father

HOLLYWOOD — Even in these times, when movie-makers are holding their heads and uttering pitiful little cries, there still are lots of people who would like to become producers. One of these is Douglas Fairbanks, Jr., a young man who already has plenty of financial security and who could go right on being unworried and famous as a screen actor. Maybe he likes the taste of aspirin—I forgot to ask him that. Otherwise, all I could learn about his motive is that he thinks it would be fun, he won't have to worry much about his male star, who will be Douglas Fairbanks, Jr.

He recently formed an alliance with Ben Hecht, and they'll do at least one film for Columbia. He also is committed to co-produce and star in a movie about the life of O. Henry. Nothing is certain after that except that if the world hasn't come to an end he intends to keep on making pictures somewhere.

British Nearly Ended Fairbanks' Ambitions In England, a few years ago Fairbanks was very nearly cured of any executive ambition. "I was instrumentally proclaimed by its spokesmen calls for a currency based on 'labor,' not 'gold.'"

Most banking authorities in Washington and Wall Street express confidence that gold will remain the chief international method of reckoning value, and that Uncle Sam will have no difficulty in putting his metal to work when the time comes. Some say that anything like free enterprise and trade in the world requires a readily exchanged standard of value, and because of centuries of tradition, almost approaching instinct, gold will remain the principal measuring stick.

A good many money experts look to the day when a revival of trade on a broad peacetime basis will bring about a better distribution of the money metal through the world, assuring that it cannot effectively serve its traditional function with the great bulk of it piled up in one country.

# Allies May Play Zog Against Axis

Albania Is Italy's Springboard to the Balkans

By NELO DRIZARI  
NEA Service Special Correspondent

Albania's exiled King Zog, living on a farm near Paris with his Hungarian-American Queen Geraldine and year-old son, is not exactly a forgotten man. He is remembered by leaders of the independence movement within Albania—and by the British and French governments.

The day has come when Italy joins the war on Germany's side, many observers believe, and-eyed, mustache Zog might come in very handy for the allies as rejuvenated lord of his subdued people. For, despite the growing wave of antagonism toward the ex-ruler among Albanians in the United States, many in Albania still cling to Zog as their hope of redemption from Italian domination.

Strained relations between King Zog and Americans of Albanian descent developed right after the king fled his country during the Italian occupation, April 7 and 8, 1939. So inimical to Zog have Albanians in this country become that they are seriously considering dropping the exiled monarch from all plans for renewed Albanian freedom.

Deserted Diplomats Albanians here contend he has not lifted a finger in behalf of Albanian deliverance.

Said one Albanian in Boston: "His follies are increasing daily. They are too numerous, and it is too late to condone them now."

Chief criticism is directed at Zog's complete apathy toward Italian charges that he had robbed his own country, left his people impoverished, American Albanians feel he might at least have issued a diplomatic paper denying the accusations and setting forth his position.

Since Zog deserted his nation, they say, it has become clear that the monarch tolerated a good deal of corruption among his high officials. Observers are also skeptical of the 10 to 12 millions of dollars Zog managed to carry out of the country with him.

This sum represents the proceeds of 14 years in power. But ask doubters, how could even a particularly astute king amass such a fortune on a salary approximating \$125,000 a year? One other thing his once-loyal supporters in America couldn't stomach: Zog's complete desertion of his diplomats abroad, Albanian refugees and the Albanian Federation of America, patriotic organization which had given him full support through its newspaper, Diella.

Smarting under this desertion, Vatra—as the Federation is known among Albanians—is determined to take action, characterizing Zog as no longer fit to head the movement for independence. This attitude has already been communicated to Zog.

With the exception of Prince Abid, Zog's brother-in-law, and Albanian minister to France, who is wealthy in his own right, envoys to foreign countries were left without funds after their king's flight. Faik Konitza, minister to Washington, is being taken care of by a group of Albanian patriots, Lec Kurti, envoy to London, was forced to leave the legation in care of his secretary. Both diplomats have pleaded in vain with Zog for funds to help carry out the independence campaign in foreign capitals.

Plans Go Unanswered Albanians in this country recall that Zog owes a substantial debt—in more than gratitude—to his countrymen in America. In 1919, when Zog

# "United Front With U.S." — Almazan

General Juan Almazan, Mexican presidential candidate, campaigns at Juarez, Mexico, advocating a Mexican united front with the United States against communism and nazism in the Americas. He promised a purge of radical and revolutionary elements in the Mexican governments if elected. Pretty Juarez girls, dress in China Poblana, national costume, greeted the campaigner's truck and demonstrated noisily.

Minor Tragedy

CRESTLINE, O.—(AP)—A set of false teeth delayed a Big Four freight 15 minutes. Trainmen said the conductor lost the set while leaning over the caboose platform. He stopped the train for a futile search. A telegraph operator found the teeth the next day.

The history of the submarine dates from 1620, the year the Pilgrims landed at Plymouth Rock.

was at the bottom of the political ladder. Vatra raised nearly \$250,000 in support of the Provisional Albanian government. He has also been supported ever since he became president in 1925 and after he was proclaimed king in 1928.

Letters to the king have made him well aware of his obligation, but he has not yet granted even a reply. Many Albanians here are not clear on why Zog departed from the Albanian capital in such a hurry. Hints have been tossed about that Zog entered into a deal with Mussolini about keeping his mouth shut and offering no resistance.

His former supporters realize Zog has been hamstringing to some extent by the European war. During his stay in Greece, and Turkey, Zog was cautioned not to conduct any propaganda that might be offensive to Italy. This doesn't explain, his former friends contend, why he never conducted any kind of personal correspondence campaign.

Despite Zog's future role in Albania's fight for freedom, relations between the former king and American Albanians are beyond the mending point. The drive for independence goes on. Recently organized in Paris was the Albanian Federation of France, said to have the backing of the French government and King Zog. Many Albanian refugees in Europe believe an open break with Zog at this time would deter rather than encourage the fight for freedom.

# 2 Softball Games Wednesday Night

Bruner Team to Play El Dorado Lions Thursday

The Softball League games will begin again Wednesday night with Snow White playing Allison Termite and the Termite playing McRae Millers.

The first game will begin at 7:30 o'clock with an hour and five minute time limit on each game.

The El Dorado Lions will play a double-header here Thursday night against the Bruner team. The Lions have been following close to the Warren team who defeated Bruner in a double-header Monday night.

## SERIAL STORY

### AN EYE FOR A GAL BY HARRY HARRISON KROLL

COPYRIGHT, 1940, NEA SERVICE, INC.

**CHAPTER IX**  
**ROSSY** followed Coach Hurd to the gym, and they went to the office. The coach was excited and smiling.  
"Yes, sir, break of a lifetime in a way. You never heard of Ike Hill?"  
"Ike Hill? You mean the baseball scout? Sure I've heard of Ike Hill."

"Mighty few young ball players itching for the big time that haven't. Well, I've worked out our schedule of games for the spring. We open with Southern College April 15. That's not so long from now, when you think about it."

"But Ike Hill—"  
"I'm coming to that. We're playing Southern on our own diamond, and Hill is stopping on his way to New York to see the game."

"You're going to pitch and you're going to show Ike Hill what you've got, that's what I mean!"  
"But—but—" Rossy gulped.  
"In other words, you've got to learn control of two things—your foot temper and your arm. I think the last depends on the first. Anyway, from now on I'll be watching you, and we'll straighten you out so that when Ike Hill looks you over he'll see something good."

Coach Hurd clapped him on the shoulder. "And you've got the stuff, too, son!"  
"Thank you," Rossy said, and rose. He asked as an afterthought, "How did you manage to get Hill to stop by? He'll be going up from Florida spring training, but this is a long way out of his way."

"Don't tell him," Rossy said.  
"Ah!" Rossy said without particular meaning. He examined the coach questioningly.  
"Prexy used to be a ball player too."

"I see. A pitcher?"  
"And one of the best—when he was going good. One of the worst when he was going bad."

"Was—was Dr. Tolliver ever at the big leagues?"  
"A season. He went to pieces when he beamed a batter and never after that was he worth a cuss. Finally he had to turn to something else."

"He went to school and then to college and wrote something that made him famous or something."

Washington D. C. will arrive Wednesday for a extended visit with her many friends and relatives in the city. She will be joined later by Mr. Johnson and they will visit friends in El Dorado, and Washington.

Miss Regina Baylis of Wheaton College, Wheaton, Ill., arrived Tuesday night to spend the summer with her parents, Mr. and Mrs. Guy Baylis.

Mrs. Mattie Warwick will arrive in Hope for an extended visit with her daughter, Mrs. Wiley Robison and Mr. Robison. She has spent the past two years in Panama Canal Zone with her grandson, Captain Al Robison of the Army Medical Corps. He will be remembered as a Hope boy.

Carl Bruner is in Hot Springs taking the baths this week.

Rev. Kenneth Spore is in Magnolia this week, where he is teaching at the Methodist young peoples assembly at the A. and M. College. Among the other Hope young people attending are Virginia O'Neal, Mary Stuart Jackson, Ella Joe Edmondson, Maxine Fayette, Jack Crank, Freddie Patton, C. V. Nunn Jr., Victor Crane, and Harlan Spore.

and then he was called here as president, and because he knows this territory and the mountain folks, he's made the school almost over and raised the enrollment from less than 300 to more than 500, and put it up in Grade A rating—into the big time, if you want to know. That's the kind of man he is."

"Yes," Rossy said, and went out.

Rossy fell to practice with a vengeance. Now and then he could take time out to remember that Dr. Tolliver had engineered all this for him. But Rossy never looked at the thick, grave college president without thinking of a day when he had gone to pieces after striking a player on the head with a pitched ball, and that other day long ago when a certain Socks Tolliver did the same thing and killed a man. That the two had connection he could not doubt.

And now, something was happening to Hannah. At the Barnyard the following Saturday night she was just about the biggest thing around the gymnasium. The boys gave her the grand rush. For a little she would actually have been elected queen of the event.

When she had first entered college, she was so awkward that every time she lifted her foot she sat down on something, and every time she opened her mouth she put her foot in it. Had she been made of the same kind of stuff Rossy was, the laughter at her expense would have run her out of college, or caused her to kill somebody.

Neither had happened to Hannah. Something in her taught her how to take it. She turned their barbs of ridicule, and shot it right back into them, so that, instead of succumbing to it, she actually became the life of the campus.

SOMETIMES it almost made Rossy jealous.  
"How about a date, huh?" he asked her once.  
"No dates for you, lank boy!" she told him. "Why, I wouldn't be caught with my head in a bucket alongside of you, you big mess of homespun chittlings!"

There was a bunch of students within earshot, and they got it, and roared with laughter. Someone said, "That's one time when you fanned out, eh?"  
Rossy wanted to pick up a peck and belt the speaker. But Judy appeared by some magic and took him away.

"Grin!" she hissed in his ear. "Grin or I'll murder you!"  
Rossy grinned but it broke something in his hard, tense face.

She took him out of hearing. They sat down on a sheltered rustic seat. She sighed, looking up at him.  
"Sometimes I think you need a good spanking more than any problem child I've ever had."

"I'm in a peck of trouble and nobody to talk to."

"I'm here."

He shook his head. "It's man's talk, not man and woman."

"Have you tried to talk it over with father?"  
"I just kind of hate to mess up with your paw—I know, he's as clever as can be, but—"

"Nonsense!" A man walked across the campus. "There he is now, Daddy!" she called.  
When her father came up, she said, "Rossy's got something to talk over with you, daddy. I've got to go to phiz-ed. Be seeing you."

She was gone, and Dr. Tolliver took her place.

"WHAT is it, McAfee? Is there something I can do to help?"  
Rossy sucked in a hard breath. He plunged in. "It's about the land—"

"I was just a shaver, not knee-high to a rabbit. When he was laid away and things were finished up, we found about 1000 acres of mountain and woods belonged to a cousin of mine instead of to me. My mother tried to get at the bottom of it, but it all seemed in good law."

Staring into space, the man did not answer for a long moment. "You think there was some friendly transfer to avoid perhaps a law suit, and afterwards the land would be restored—something like that? But the accident to your father caused the other family to hold on to the land."

"Well, it might be hard to prove. I suppose your mother made a real effort to repossess the property. Still, I might be able to help you somehow."

"I've heard of that valley up there a lot—Hell'n-Damnation. I wouldn't mind making a visit up there." His voice trailed off again.  
"Tell you what, McAfee. Just keep quiet for a while. Perhaps we can work out something. We'll go up there now pretty soon. Say the weekend of the opening ball game between Lincoln and Southern. I'll be free about then. By looking the ground over, we might work something definite out. How about that?"

Rossy nodded, feeling that Dr. Tolliver knew the ground, and what he would look for.  
(To Be Continued)

is Washington's minister from Denmark—but the status of his country has. When the minister receives an order from Copenhagen today, how can he know whether it comes from the government that appointed him or from some Nazi overlord?

Dr. A. Loudon is another man whose daily problems must cause sleepless nights. Queen Wilhelmina, to whom by oath he owes his all, and her government, are in London; and, Arthur Seyss-Inquart, the Australian Nazi leader, is in supreme command of all the civil functions of the Netherlands.

In a similar plight is Wilhelm Munster from Norway. The great lobe of the country that he represents and by far the most important section of it from a stand-point of population and industry, is in German hands.

These are the ambassadors and ministers still active in Washington in behalf of their saddled or conquered countries. There is another one whose official status has been turned inside out by recent European upheavals.

Dr. Edgar L. G. Prochnik, whose Austria was among the first to go down the Nazi maw, is teaching at Georgetown university. Outwardly he has given up—retired from foreign service—but privately he works and dreams of the day when his land will be free again.

The same undoubtedly could be said for all these other men without countries, but the fact that some still owe allegiance to nations who openly welcomed the Nazis with outstretched arms makes it impossible for them officially to admit anything but that their governments acted wisely and well.

Veterans of these struggles to free little lands from vassalage is Mr. Foplocki, who started working for Polish independence 35 years ago when he was 16 years old and now takes up where he left off when the World war struck the shackles from his country.

The social status of these ambassadors without a country is unchanged. Washington still recognizes them as representatives of the nations that appointed them. They still call almost daily at the state department and report or confer on the affairs of the world.

But behind the scenes, they rapidly are becoming the State Department's problem children. Refusing to recognize a conquest is one thing, but when you have to straighten out the affairs of Americans and the United States government in a conquered land that's another.

## Life Saver at 3

MCPHERSON, Kans. — (AP) — Three-year-old Marlene Jeffers' seven-month-old sister, Marian, fell into a small tub of water while she and Marlene were alone in a room. Marlene held Marian's dripping head above water until her mother came to the rescue.

Greenland is nearly three times as big as Texas, but has only 17,000 inhabitants. Its capital is Godthaab; population 1,313.

## Gas Gas All Time

Mrs. J. S. Feltz says: "Gas on my pump even seemed to pump on my heart. After this, however, I could get on my feet and I wish, even now, never felt better."

## TWENTY YEARS AGO

From the Columns of The Star of Hope.

June 12, 1920

Mrs. Charles T. Hall and children, Amboline and Edward McCorkle Hall of El Dorado, arrived yesterday for a visit with relatives here.  
 Miss Ruby Rucker will return from DeQueen tomorrow for the dance at the Elk's Club. While here she will be the guest of Miss Dell McRae.  
 Miss Mable Ethridge will entertain one day next week for Miss Katharine Strickland, of Concord, Ga., the attractive guest of Miss Dell McRae.  
 Mrs. Carl Monk and children, Margaret and Carl, Jr., returned to their home at McAlister, Okla., yesterday after a pleasant visit with Dr. Alonzo Monk and Mrs. Monk.  
 Misses Sophia and Willie Perkins went to Conway yesterday for a visit to Miss Nannette Akin, who will be married soon to their brother, Mr. DuVall Perkins. Miss Sophie will be one of the bridesmaids, while Miss Willie will assist with the violin in the nuptial music.

## Answer to Cranium Cracker

Questions on Page One

1. Uahum was a Hebrew prophet.
2. Naboth owned a vineyard.
3. Naomi was Ruth's mother-in-law.
4. Ezekiel was a major prophet.
5. Hezekiah was a king of Judah during part of the 7th century B. C., who tried to abolish idolatry among the Jews.

happen. In the United States, 130,000,000 people. In South America, 90,000,000. In Canada, 11,000,000. If these people take their stand together, now, they need fear nothing.  
 We of the new world have the right to develop our countries and our lives as we see fit. On this ground, laid out by Monroe 117 years ago, we take our stand.

## WE THE WOMEN

By RUTH MILLETT  
 There is no longer any need for a woman's being Middle-aged. If she is smart, a woman today need go through only three ages—all of which she can make attractive.  
 She can get by safely with being a girl until she is thirty. From then on she can be a woman until she has great-grandchildren and comes under the heading of "a grand old lady."  
 But the dreaded period, the age with nothing to recommend it called "middle-age" can be avoided.  
 The middle-aged woman of the past (and there are still lots of them today, though there needn't be) can be pictured in a few phrases.  
 First her looks. She had given up smart coiffures and was fixing her hair in some way that made her look neat and tidy, though scarcely smart or glamorous.  
 She didn't bother with make-up unless she was dressed for a party and then she put it on in dabs. She was not interested in her figure.  
 She wore sensible shoes, was devoted to black, brown and navy, for when she bought clothes she thought first of all "Is it practical?" It never occurred to her that something light and gay and frivolous looking might be as practical as something drab.  
 Her interests could be counted on the fingers of one hand. Her family, her home, her garden, her church work. Her conversation revolved around those interests and it was a about Junior's tendency toward colds or a new recipe.  
 Nice Enough Person—But Dull  
 She looked respectable—but hardly interesting. She did her duty, but added little to the interest or gaiety of life.  
 In short, she was a Middle-aged Woman.  
 Today, a woman of her years can be whatever she likes. She can look smarter than her daughter, be as gay and charming as she pleases, pay a good game of golf, ride, swim, dance.  
 Her interests can branch out into any field. She reads, talks, thinks—knowing it is as necessary in this world to be entertaining as to be good.  
 She's a woman—not a middle-aged woman—and she is fun to have around.

## The Mail Gets Through

LOS ANGELES—(P)—Kindness to dogs is reducing the bites inflicted on mail carriers, says Homer Hobbs, chairman of the mailmen's committee on the dog problem. So far this year only 15 mailmen have been bitten, far below the rate of previous years.  
 Hobbs said one carrier had made friends with a vicious dog by bringing it a bone. Investigation showed that the dog's aversion to mail carriers dated from the time a postman had sprayed it with an ammonia gun.

## MARKET REPORT

## MIND YOUR MANNERS

T. M. REG. U. S. PAT. OFF.

Test your knowledge of correct social usage by answering the following questions, then checking against the authoritative answers  
 1. Is it good taste to send printed birthday cards to friends?  
 2. If a friend sends you a birthday card, should you write and thank him.  
 3. Should the girl or the boy be the first to give the other a birthday gift?  
 4. May a telegram of best wishes take the place of a card or gift on a friend's birthday?  
 5. When you give your photograph to another person may it be considered a gift for a special occasion like a birthday?  
 What would you do if—  
 You are a girl sending your photograph to a young man who has dated a long time and who has asked you for it—  
 (a) Write a message on it?  
 (b) Write nothing on it?  
 Answers:  
 1. Yes.  
 2. Yes. Mention that you received the card and how much you appreciated it.  
 3. The boy, always.  
 4. Yes.  
 5. No. That seems to be placing too much value on it.  
 Best: "What Would You Do?" solution (b).

## Kilmer Was Right

HOPKINSONVILLE, Ky.—(P)—They sent for a plasterer when a wall in a local restaurant began to bulge.  
 The plasterer discovered it 160, seven inches in diameter, growing inside the wall.  
 What puzzled him was the fact that the tree, despite absence of soil or sunlight, was growing five feet above the ground.  
 In Germany, it is a crime to call a man an "Englishman." And also, over there, to be one.

## The Religious Touch

LOUISVILLE, Ky.—(P)—A pick-pocket went to church, Dr. William Bruner reported sadly to police. While standing in receiving line to extend the "hand of fellowship" to new members, Dr. Bruner said he was given a shove from behind. Soon afterward he missed his wallet and \$41.

## Planes Decide — Not the Most Men

Outcome of Battles Today Depends on Air Strength

By MORGAN NM. BEATTY  
AP Feature Service Writer  
WASHINGTON — The nation with planes to burn wins the battle—perhaps the war.

That's air power.  
Until May 10, when the Germans started their blitzkrieg through western Europe, air power was largely an academic argument between airmen and generals—the kind of word tangle that disgraced such great prophets as General Billy Mitchell of the U. S. Air Service.

More than a decade ago, Billy Mitchell told the generals what was coming. But he couldn't prove it.

Now it has happened.  
Go behind the scenes with the military men. Let them point out on maps the German drive through the low countries and France.

"Blitzkrieg?" you ask.  
"No," they answer; "AIR POWER!" German air power blasted every step of the way, told the motorized corps where the enemy waited in force and protected it from devastating assaults from French and British bombers.

The German planes zoomed out in full daylight, exposed to the anti-aircraft fire. Hundreds of pilots paid the penalty of daylight air war; but many completed their missions of spying, bombing, spotting artillery.

And the Germans still have planes to spare!

Allies have no planes to spare, so they roar out in force mainly at night. Their aim is poor then—but they avoid widespread destruction.

All of this adds up to German air supremacy—temporarily, at least.

Same Saw It Coming

Strange this should have happened when there were so many ominous warnings in the sky.

The first of these was the ghost of Baron von Richthofen, Germany's World War ace of aces, who discovered the germ of air power when he invented his flying circus. Those roving German airmen proved that superior air force at a critical point could prove a decisive factor in warfare.

Then Billy Mitchell told anybody who'd listen that armies were no longer front forces, but holding forces.

A few years later, Charles A. Lindbergh unwittingly gave air power its greatest shove forward when he flew to Paris, fired the world's imagination, started commercial aviation toward greater heights.

Each new advance was absorbed in to military aviation, especially by the Germans. Other nations were not so fast to recognize that command of the land and the sea were insufficient.

In 1938 came the Spanish civil war, and Munich, when Hitler's threat of air power brought a humiliating peace to most of Europe.

## Low, Lean and Lissome

This is the Studebaker Commander for 1940, now making its debut at the local Studebaker showrooms. A powerful six, styled by Raymond Loewy, its low-slung grace augurs for quick popularity. Its overall length is 197 1/2 inches.

## How the Gold Rolls in! What Will Happen If Germans Win

While gold sack of the U. S. bulges with nearly four-fifths of world's supply of 25 billion, the great nations of Europe have but small holdings, much of which is stored for safety in vaults abroad.

By JOHN T. FLYNN  
NEA Service Financial Writer

People are beginning to ask what will happen if Germany wins. There is a whole range of possibilities and probabilities which invite the attention of those who like to speculate on the future. At least one phase of that very much clouded future is interesting. That is the part that deals with our great gold reserve.

As the terrified civilians have streamed out of the invaded countries ahead of the German blitzers, so the terrified gold has come hurrying from everywhere for safety here.

In January we had 18 billion out of the world's 25 billion of gold reserves. Now we have 19 1/4 billion. More than a billion dollars of frightened gold has crossed our borders.

As the war continues more will come. Beyond doubt great quantities of British and French gold and the stocks of other countries like Holland and Belgium which sent their gold to Britain, will start flowing here. In fact it has already started. How much will we have by the time the war ends? Suppose England and France, defeated, should send all their gold here? What would be the condition of Europe as the victor looked around to pick up the pieces of the economic system he had smashed? The totalitarian countries have but little gold. Officially, Italy has 193 million. Germany 29 million, while Greece, Rumania, Hungary, all others between them have but modest sums. Can it be that, through the sheer necessities of the situation, Europe

Finick told the story of a wrecked Italian blitzkrieg at Guadalajara.

"Here were nearly 40,000 Italians who had broken through our lines. Tanks and great motor lorries filled with troops. They came roaring along that macadamized road — a whole army on wheels. We came over, squadrons of 15 in close formation. We dumped every bomb we had on the tanks in front and the out-tons of high explosives. In two minutes the tanks and road were a shambles. Two minutes! Maybe Pilot Finick exaggerated. But what would not France and Belgium have given for superior air force to blast Germany's blitzkrieg on May 10, before it got rolling?

What about Germany using air power against England? The Germans could concentrate on locks and wharves in an attempt to starve the British. Most of Britain's food comes from the holds of ships. British Air Group Captain L. L. MacLean says three bombers flying abreast and carrying three tons of bombs, could devastate 102 acres.

"On this basis," he says, "820 planes could cover Hull, Newcastle, and the port of London docks area."

If Gen. Nathan Bedford Forrest were alive today, doubtless he'd amend his famous remark. It's not the "mostest men," any more. Victory favors the side with the mostest, the fastest, and the bestest—AIR POWER!

## Still Had the House

ST. JOSEPH, Mo.—(AP)—Mrs. Millie L. Gordon went to Kansas City recently and saw some hard-boiled eggs on display.

That reminded her that she had forgotten to turn off the fire under eggs she had been boiling when she left her home in St. Joseph.

She telephoned the St. Joseph fire department, asking an investigation of the situation in her kitchen. The firemen reported, a short time later, that the eggs had been reduced to ashes; the pan was red hot but there was little other damage.

British golf courses are being used for rifle ranges to train volunteer civil defense guards.

## Practice Blitzkreig

Members of 115 Observation squadron of California National Guard hold a private blitzkrieg practice near Los Angeles to attack ground crews with proper anti-aircraft defense and surprise-attack elements. In the photo, a machine gun nest goes into action against a low-flying attacker.

## Self-Service Night Club Is Success

Hot Spot Packs 'em in — It Has No Bouncers

By TOBY WIANT

NEW YORK — Just about everybody on Broadway gave Richard M. Decker the horse laugh when he said he was going to open a cafeteria night club which would give each guest the music of three orchestras and a dinner for sixty-five cents.

They predicted he would lose his shirt, probably his pants. Decker kept his shirt, his pants and added a pocketbook full of folding money.

Since opening last Nov. 21, his self-service, two floor night club—The Fiesta Danceteria — has entertained more than 1,000,000 guests. It is New York's biggest night club... and one of the most prosperous. It drew 210,000 people the first nine weeks.

Decker born in Hungary, was practically penniless when he came to New York in 1921. He got a job as an automobile body painter at \$8 a week, saved most of it, started a dance academy. Then he branched into catering, built a chain of Italian restaurants which he sold at a profit.

About five years ago he hit upon the idea of a self-service night club. This idea materialized in The Danceteria, a sort of "subway Stork Club." It caters to home crowd... families on slim budgets.

On week-day nights the average check is 75 cents; on Saturdays, \$1.25; on Sundays, 90 cents.

If you don't want to eat up that check, you can drink it up. Beer is 15 cents a glass. You can get champagne cocktail for 50 cents. No hard liquor is sold. More than 10,000 plain sodas, 7,000 ice cream sodas and 2,100 banana splits are sold weekly.

The bands usually include one name chestrans. Among the "name" organizations which have played The Danceteria are these of Toddy Powell, Ben Bernie, Van Alexander and Gene

Krupa. But Decker discovered the public is interested only in good music, name or no name band. The Danceteria has shattered many night club and restaurant prece-

denis. For example, Monday nights always have been considered bad for business, but The Danceteria jams 'em in on Monday. Other spots refuse to permit two women to dance together. The Danceteria encouraged it.

The Danceteria has no bouncers there never has been a fight. Decker said. About the only problem that has been able to solve is that of space.

## REMEMBER DAD FATHERS DAY June 16th

Dad is KING for a day — June 16th is Fathers Day. He's a swell fellow — and you know it! So show him on His Day that he's more than the "guy that foots the bills." Though he may not admit it, he's just a little bit sentimental and you can make him ever so happy with just a small gift on Fathers Day, selected at ROBINSON'S.

Give Dad a Shirt He Will Truly Appreciate

## Shirtcraft Shirts

Do right by Dad. Give him the kind of shirt men admire. One that fits perfectly, stays that way after many trips to the laundry. One that is patterned in the newest trend, styled to perfection in cool crisp broadcloths, mesh and other light weaves for a cooler summer.

\$1.55

## WHITE SHIRT-CRAFT AIRMAN

You pay no premium, but you collect dividends with the fray-proof "Life Insured" collar on Shirtcraft White Airmen. And you pay no premium for the lustrous quality broadcloth and the smooth, permanent fit.

\$1.95

For Sports Loving Dads

## SLACK ENSEMBLES

This summer Dad can keep cool and comfortable. And do it in style too, if you give him a sporty Slack Suit. A variety of interesting weaves and colors will help you select one he will like best.

\$2.98 UP

More Underwear Comfort

## MUNSUNG UNDERWEAR

No matter which type Dad prefers he will enjoy more underwear comfort if you give Munsung. Knitted briefs broadcloth shorts that won't bind. Swiss rib shirts made of Durene.

50c

Every Dad Is Sure to Like

## HICKOK JEWELRY

Initialed tie chains to keep Dads tie from blowing in his face while driving or walking in a breeze. Guaranteed not to tarnish, toothed grip to keep it from slipping on his shirt.

50c to \$1.00

Quality at a Price

## HAMPTON SHIRTS

Fine quality broadcloth in an interesting selection of patterns or solid colors. Tailored with all the care of fine shirt-making, yet at the lowest possible price for a fine shirt.

98c

Sporty Belts For Dad

## HICKOK BELTS

Reversible belts to wear with sports trousers. White on one side, easily reversible to show a color on the other side. Also solid whites in tongue or slide styles.

98c

For Hot June Days

## SPORT SHIRTS

Lightweight champions to keep Dad cool and comfortable. Breeze-catching mesh, rayon, and other cool lightweight weaves that take the shimmer out of summer and the temper out of temperature.

79c to \$1.55

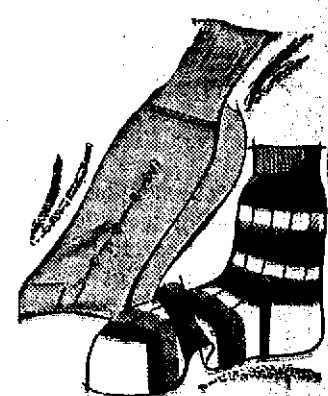

The tie Dad buys for himself. He can crush 'em, twist 'em, knot 'em... they're NON-CRUSH Wembley NOR-EAST. The exclusive Priestley fabric of Wembley NOR-EAST ties is loomed by secret process that keeps them looking gracefully new and free from wrinkles.

\$1.00

Every dad likes Phoenix Sox... in either EV-R-UPS or regular lengths. Dad knows that Phoenix are the smartest when it comes to patterns and colors. And, too, Dad likes the way Phoenix Socks fit and wear.

35c for \$1.00

## OUT OUR WAY

By J. R. Williams

## New Hydra-Matic Drive Is on Olds

Oldsmobile Now Thinks and Acts for Itself

A car that has no clutch or clutch pedal. A car that is capable of "thinking" and acting for itself to the extent of shifting gears automatically back and forth through four speed ranges. A car which needs only the use of accelerator pedal, brake and steering wheel to control it in 99 per cent of all driving! A car with a motor which cannot stall, and which responds with all the flexibility of electricity or steam!

In the most sensational announcement made in the automotive industry in years, Oldsmobile claims these advantages through their new Hydra-Matic Drive, which will be available on all three series cars which Olds is offering for 1940. The new drive is the product of eight years of intensive work by the Oldsmobile engineering staff, and it will be manufactured for Olds by a newly created division of General Motors in a special \$3,000,000 plant in Detroit. It will be an exclusive Oldsmobile feature for 1940.

"Hydra-Matic Drive simplifies car control so amazingly that we believe it will mark as decisive an advance in car design as did the electric self-steering or four wheel brakes," says C. L. McGuen, general manager of Oldsmobile.

"Briefly, it consists of a liquid flywheel combined with a fully automatic transmission, which is the outgrowth of the automatic safety transmission brought out by Olds more than two years ago. The liquid flywheel when combined with the automatic transmission eliminates the mechanical clutch and achieves many things that have been sought for years by automotive engineers. The simplicity, flexibility and freedom from wear inherent in the liquid flywheel have been common knowledge among engineers for 50 years, but until the perfection of this automatic transmission has it been possible to take full advantage of them.

"Most noticeable simplification of driving controls in a car equipped with Hydra-Matic Drive, is of course the absence of a clutch pedal. The left foot has no other duty than to control the headlight beam button in night driving. The right foot controls the accelerator and foot brake as in the past. Under the steering wheel is a lever with four positions indicated on a quadrant, indicating "Neutral," "High," "Low" and "Reverse."

To start the car moving and get

away, just four operations are required. Turn the ignition key, step on the starter, move the lever under the wheel from "Neutral" to "High" position, step on the accelerator, and the car moves forward smoothly, changing its own gears through first, second, and third, until at 23 miles an hour, it enters fourth speed, a direct drive with a rear axle ratio of 3.5 to 1. The whole process requires a dozen fewer operations by the driver than with a standard clutch and transmission. Virtually all driving is done with the lever in "High" position. "Low" is used only in deep sand or mud or in climbing or descending an extremely steep hill, where it is desired to keep the car in low gear.

"Thus, merely the pressure of the foot on the accelerator controls a speed range from a mile an hour to full throttle. If quick acceleration is needed to pass slower moving vehicles on the road, it is only necessary to press the accelerator all the way down, and instantly the gear changes from fourth to third, or "pick-up" gear, which is the equivalent of a rear axle ratio of 3.25 to 1. Partially releasing the accelerator returns the gear to fourth.

"Most striking, however, is the demonstration of flexibility afforded by the performance of Hydra-Matic Drive on a hill. The new Olds can be driven up a hill at a snail's pace, and even stopped on the steepest hill without using the brake. By slightly depressing the accelerator the car can be held by the power of the motor partially applied through the liquid flywheel. Nor will this result in any injury or wear. From such a dead stop, the car will climb smoothly on up the hill by merely giving it more gas. And there is no possibility of stalling the motor.

"This sort of performance on a hill is made possible by the extraordinary advantages of the liquid flywheel, teamed up with automatic gear changing, as compared with manual shifting and use of a mechanical clutch. A comparison of the way the two devices operate is necessary to understand these advantages.

"With a mechanical clutch, engine power is applied gradually to the transmission and rear wheels by increasing the friction between two discs until they hold firmly. The slippage between these two discs cushions the shock of applying the engine power, and does it well or badly according to the skill of the driver, and the amount of wear the clutch has undergone. Since gradual application of power through a mechanical clutch depends upon friction—and friction inevitably means wear—the best mechanical clutch that can be made starts to wear out from the instant it is first engaged.

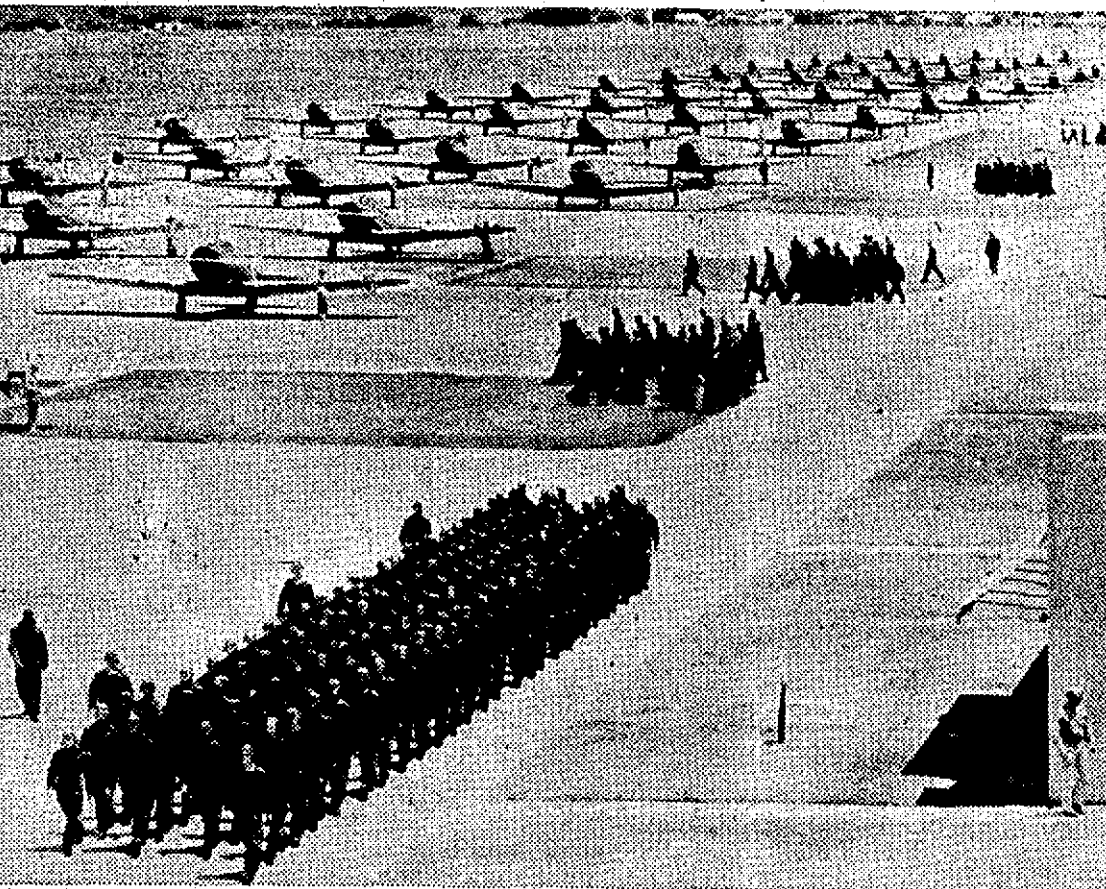

"But with the fluid coupling of the Hydra-Matic Drive, an entirely different principle is employed. Instead of the flat plates of the mechanical clutch, there are two rotors, resembling shallow steel basins, exactly identical in size and shape. Their concave surfaces are divided by vanes into exactly similar patterns. These rotors are mounted with concave surfaces facing, one thirty-second of an inch apart, one attached to the crankshaft of the engine, the other to the automatic transmission. Both are enclosed in a steel housing, filled with oil under pressure from the automatic transmission.

"When the engine is started, and the rotor attached to the crankshaft starts to revolve, oil from its vanes is thrown by centrifugal force against the vanes of the rotor attached to the transmission. With the engine idling, the force is small, not enough to move the car. The oil is "slipping" between the rotors. But the slipping oil is not like slipping clutch plates—there is no wear or injury. As the motor speed increases, the slip lessens, the rotor attached to the transmission begins to turn and the car

The clutch and clutch pedal have been entirely eliminated in the 1940 Oldsmobiles equipped with the new "Hydra-Matic Drive." With this sensational device, exclusive to Oldsmobile, all the driver has to do is step on the accelerator, steer and stop. Photo shows the front compartment of an Oldsmobile equipped with "Hydra-Matic Drive."

## Mass Pilot Training Reality

Flying Cadets march in military formation near their training planes at Randolph Field, Texas, just before the daily training program gets under way. Almost 500 pilots-to-be are now in training at this "West Point of the Air," part of the Army Air Corps' goal of training 7000 pilots annually.

NEA Service Telephone

## Government Takes

(Continued from Page One)

International Highway. Big smelters working full blast. Well-paved streets. Modern tourist camps for highway travelers. Business good, though some merchants and hotel keepers complain of slackening off of tourist trade, owing to rumors of revolution.

Bus line, Monterrey to Tampico, route partially over International Highway. Just south of Monterrey, first sign of new Spanish loyalist influence. Small column of marching men wearing blue uniforms and berets. Identified as Spanish refugees who had a co-operative town in Tampico. Once a rich oil center, now presenting a general run-down appearance. Prices high, even with the depreciated peso. Government now engaged in reorganization with a demand upon the oil unions for the dismissal of some 1800 workers and other major economies. Oil unions threaten strikes and other trouble. Workers feel they are not as well off today in real wages as they were before the expropriation of oil properties.

The peso, which had been pegged at 3.5 to the dollar dropped until it has reached 5.95 to the dollar, causing tremendous rise in prices and less buying power under expropriation pay than before.

This section favors candidacy of General Almazan for president, as he has announced his intention to settle the oil controversy in accordance with international law in the interests of both the United States and Mexico, and in the interest of Mexican workers.

Tampico to Mexico City. Modern plane service on schedule of 1 hour.

crankshaft vibration cannot be conveyed through its oil cushion to the transmission. Likewise the smooth application of power which it affords, means far less wear and strain on the rear axle gears.

"Because the driving and driven rotors are exactly alike, the engine can serve as a brake in descending hills or in any deceleration, just as it does with mechanical clutch and standard transmission. The action between the rotors is merely reversed, and the driving member becomes the driven. For normal deceleration, the control lever can be left in the "Hi" forward position and the foot removed from the accelerator. For more active control when descending steep grades, the control lever can be moved to "L" forward position which keeps the drive in first or second gear.

"Actually, about the only operations left for the driver of a car equipped with Hydra-Matic Drive are to steer, stop and start. We believe that it simplifies the control of a car literally to the last degree possible, and that it will by the same measure increase the safety and pleasure of motoring."

and 40 minutes as compared with railroad schedule of 24 hours.

Business Good In Capital Mexico City. As always, one of the most beautiful cities in the world. Adobe shacks formerly to be found in center of old city torn down and replaced with modern apartments. Beautiful parks and suburbs. Buses instead of old street car lines in many streets. Traffic jams. Business good—so good it takes at least three months to get a telephone installed.

By rail, Torreon to Chihuahua. Neither of these cities on International Highway and not sharing in this prosperity. Some civic improvements and while housing conditions improved, have not risen materially above the old Mexican level.

Torreon essentially dependent on cotton production of Laguna valley and with drop in cotton prices Torreon suffered.

Chihuahua formerly handled vast shipments of cattle, but these have disappeared and the city now principally engaged in selling and handling of mining machinery. Chihuahua fears America congress will stop silver premium payments.

Both Torreon and Chihuahua isolated in all directions by roads in the rainy season, and are agitating for another highway from El Paso to Mexico City via Torreon and Chihuahua, which they hope will bring them a share of the tourist business now passing far to the east.

(The End)

## One British, Five

(Continued from Page One)

Lake Leman Wednesday morning showed them to be of British origin.

Ethiopia Bombed PRETORIA, South Africa—(P)—The first South African war communiqué said Wednesday:

South African air force of heavy bombers Tuesday attacked military objectives in Abyssinia (Ethiopia). "Extensive damage to buildings, personnel, roads and equipment was done."

Revolt in Ethiopia?

NEW YORK—(P)—A British radio report Tuesday night said reports had been received in London of a revolt in Italian-occupied Ethiopia and the raising of the Imperial Abyssinian standard by an abysinian.

"Abyssinian tribesmen are getting ready to take their revenge," the broadcast said.

Italians, French Ready

GENEVA, Switzerland—(P)—Crown Prince Umberto is planning to send his Italian shock troops against the French line in the southern half of the Maritime Alps, advisers reaching Geneva from both sides, indicated Wednesday.

In this sector the French moved more men and munitions into the valley of the Durance river, the logical high road to invaders seeking the

## President Brazil Favors Dictators

Vargas in Ominous Statement From South America

RIO DE JANEIRO—(P)—President Getulio Vargas, Brazil's dictator, proclaimed neutrality in the Allied-Italian war Tuesday in a decree preceded by a vigorous speech interpreted as a defense of totalitarian ways.

"We are marching toward a future different from all we know in economic, political and social organization and we feel that old systems and antiquated formulas have entered a decline," he said. "It is not as pessimists and stubborn conservatives pretend, the end of civilization, but the beginning—tumultuous and fecund—of a new era."

"Vigorous peoples fit for life must follow the route of their aspirations instead of in contemplation that which crumbles and falls in ruins," the president asserted. "It is necessary consequently to understand the new epoch and remove the rubbish of dead ideas and sterile ideas. We are crossing, and all humanity is passing, an historical moment of grave repercussions resulting from rapid changes in values."

Vargas prefaced these remarks with a declaration that "We are united by ties of strict solidarity with all American countries around the ideas, aspirations and common interest in our defense."

Brazil, South America's largest country, its southern provinces filled with Germans and Italians, is regarded as the most vulnerable country in this hemisphere to attack from without or disorder within.

## Panzer Divisions

(Continued from Page One)

11 Panzer divisions have a tank total of probably 5000 to 5500. The lightest tank weighs six to seven tons, is armed with one to three light machine guns and one 20 or 37-mm.

way to the French Rhone valley.

Although hardly a shot had been fired in the war between France and Italy, activity behind the lines was intense. Many Italian and French observation planes were in the air.

Main strength of the Italian and French forces, it was reported, is spread from the sea to Larche Pass, where a mountain highway leads from the frontier to Barcelonnette. North of this front, the only big concentrations were reported to be at the border at Obelisk Pass, just outside Briancon.

Mont Cenis and Little Saint Bernard passes, on the northern part of the Alpine front, were reported to be held only by defensive forces on both sides.

anti-tank gun. It carries a crew of two or three men, can travel 25 to 30 miles an hour.

One tank in this weight class is a special assault type, powered by a 170-horsepower Diesel engine. It can drive 85 miles per hour on good roads, 50 across country.

Probably the biggest tanks are the "break-through" types. These carry crews of eight to 16 men, are capable of speeds of 18 miles per hour. Organized into regiments of 36 tanks each, the 20-ton machines are attached to advance echelons for short periods only. These tanks are reported to have a very short radius of action, which means the fuel carrier tank or armored cars must be used to keep them in action.

A third type of tank reported on the Western Front is the 30-ton amphibian, but little is known of it.

Fuel Consumption Tremendous. A panzer tank brigade includes two regiments of two battalions each, each battalion consisting of three light tank companies and one medium tank company. The strength is 288 light and 72 medium.

Fifty armored cars attached to every tank brigade are employed in a number of missions. They may be part of the first attacking echelon, they may cover the forward movement of the mechanized artillery or they may have liaison or reconnaissance missions. These cars are light, cheap, thinly armored, fast.

Each Panzer division has about 11,000 men, including one motorized infantry brigade, one motorized artillery regiment, one anti-tank battalion, a motor-mechanized scouting force and the usual engineer, signal and air co-operation units.

Estimates set fuel consumption for the 11 divisions at 500,000-600,000 gallons of gasoline daily, 40,000-50,000 gallons of oil.

## One Pony Express Rider in Arizona

He Has to Walk During Mail-Order-Catalog Season

AP Feature Service TUCSON, Ariz. — Arizona's only pony express rider has one hazard his Indian-fighting predecessors never knew: That's the mail-order catalogue.

## AIRPLANE BUILDERS

Unusual opportunity for men 18 to 35 to be specially trained and ready in 8 to 12 weeks for airplane construction jobs in large California airplane factory. Minimum starting wage for this work 50c per hour. Part tuition, transportation needed to start, balance tuition out of pay while on job. Special representative will be in Hope Monday, June 17, to select two (2) men. For interview write or leave name, address, occupation and phone number, care P. O. Box 98, Hope or Hope Star Office before above date.
